5 FLUCEL 250MG INJECTION

Overview

Instructions

Side Effects

Introduction:

5 Flucel 250mg Injection contains the active ingredient Fluorouracil. It is an anticancer medication indicated to treat cancer in the bowel, oesophagus, pancreas, stomach, head, neck, and breast. It is prescribed along with other anti-cancer medicines and radiotherapy.

Nausea, vomiting, bone marrow suppression are the most frequently occurring side effects associated with this injection. Ensure that your physician conducts blood tests for you during and after this treatment to check the level of cells in your blood. Inform your physician before starting this treatment if you are following a controlled sodium diet.
